

# God helps the seeds to grow into plants

Seeds and plants need warmth and water to grow big and strong. Draw a yellow sun, then draw some raindrops at the other side of your picture.

Draw a path from one side of your page to the other then lots of seeds, some on the path and some either side of the path. Use a green crayon and draw a new plant growing up from each seed.

You might want to add some birds waiting to eat the seeds that have fallen on the path!
